

Planned Parenthood: Abortion. No matter what.

Planned Parenthood bills itself as “the nation’s leading provider and advocate of high-quality, affordable sexual and reproductive health care,” but what do the data and the dollars say about Planned Parenthood’s services and priorities?

“ While Planned Parenthood was reporting revenues of more than \$2 billion and paying its top executives high six figure salaries, the New York Times reported “some clinics are so short of cash that care has suffered. Many operate with aging equipment and poorly trained staff, as turnover has increased because of rock-bottom salaries.” So where was all that money going? “Much of the national funding to affiliates went to legal support, public campaigns to expand abortion access and subsidies for patient navigators who help patients access abortions.... leaders say they have repeatedly prioritized the fight for abortion rights over clinics because the political fight was fundamental to the organization’s ability to operate.”

A PROVIDER INCREASINGLY FOCUSED AND DEPENDENT UPON ABORTION

PPFA CLINICAL SERVICES	CHANGE 2009/10 vs. 2023/24
 Clients	-31.7%
 Total “Services”	-6.3%
 “Cancer Screens”	-80.6%
 Contraception	-43.1%
 Abortion	+63.9%

118 of PPFA’s clinics offer abortion pills at **12 weeks** LMP, two weeks past the FDA authorized protocol, increasing the likelihood of failure and complications.

PP staff in “red states” act as “travel agents” sending women to abortion clinics elsewhere.

PP now has 54 Telehealth or “Virtual Clinics,” several offering abortion pills by mail.
